

Support for your success

Make the most of your Zonar investment and your employees' time. From basic trainings to comprehensive modules, our onsite training helps you use our solutions to your best advantage. Choose the training modules you need, then contact us to build a schedule that makes sense. Trainings are available in one-day, eight-hour increments.

Ground Traffic Control®

EVIR® Admin

60 minutes | Ideal for admins | Max 10 people per class

Learn to manage your inspection data and gain insight on your fleet's operational status.

Covers: Logging in, home screen, inspections, incomplete inspections, missing inspections, manage drivers

EVIR® Mobile

60 minutes | Ideal for admin, compliance managers & mechanics | Max 10 people per class

Learn how to navigate, view and interact with the driver inspection reports in a new web platform.

Covers: New features of EVIR Mobile, how to handle mixed EVIR fleets, inspection configurations and adding rentals.

Ground Traffic Control Admin

60-90 minutes | Ideal for admins

Max 5 people per class

Learn to set up and maintain various entities within that Ground Traffic Control account.

Covers: Managing locations, managing zones, managing users, managing assets, ZAlerts, additional reports and functions

Zonar Verify™

2 hours | Ideal for admins & dispatchers

Max 10 people per class

Covers: Using RouteBoard to substitute drivers and buses for daily routes.

Note: Setup & linking of Routefinder with students and routes must be completed before this training.

Ground Traffic Control Dispatcher with ELD

90 minutes | Ideal for admins, dispatchers & trainers

Max 8 people per class

Learn to use the GPS tracking function to view location and speed information. And how to ensure your fleet is complying with the ELD mandate regarding their hours of service.

Covers: Logging in, home screen, GPS unit health, GPS units report, Location report, Path report, Schedule report, Audit report, aligning drivers to dispatchers, Location filters, notifications and alerts, Admin Attributes—Driver Groups, Manage Drivers—Assigning Groups, No Driver Reason (setup), HoS reporting, Messaging, Speed report

Ground Traffic Control User

2 hours | Ideal for admins | Max 10 people per class

Learn to use basic GPS tracking reports.

Covers: Logging in, home Screen, GPS unit health, GPS units report, Location report, Path report, Schedule report, Audit report, Hardware Overview, Zones, Speed report

Zonar MyView™ and MyView Ridership

1-3 hours | Ideal for admins and dispatchers

Max 6 people per class

Learn to set up and maintain school, bell schedule, student, key (route) and asset data. Substitute assets on routes and send various notifications to MyView app users regarding temporary changes, including bus substitutions, modified schedules due to weather, mechanical issues and modified class schedules. For a full experience, a preselected and appropriately equipped bus may be used to provide a demonstration during training.

Covers: Setup, user management, operations, parent app installation, troubleshooting

Note: If purchasing MyView Ridership, Z Pass Management training may be required as a prerequisite.

Z Pass™

2 hours | Ideal for admins | Max 10 people per class

Learn to track student ridership individually and based on routes.

Covers: Z Pass and Z Pass+

Zonar Coach Admin™

**60 minutes | Ideal for admin & compliance managers
Max 10 people per class**

Learn how to setup and review driving behavior.

Covers: Adding drivers as users (individual driver email addresses are necessary). Driving behavior that Coach detects. Categorize acceptable behaviors for (Light, Medium, Heavy Duty) asset types. Reviewing recorded driver behavior.

Incident Response Center: Asset & Driver views, Exporting, Asset, Driver, Driver and Date Range filtering
